

The intuitive OJ Microline® series

Design that feels like home

Easy2Use

– read all about how OJ Microline® provides you with the next level in temperature management

Form and function –
combined in elegant
high-quality design

1-2-3-GO

Maintaining perfect room temperature has never been easier. The OJ Microline® series is designed as a plug & play solution and thanks to the simple installation and intuitive interface you can quickly get started. All you need do to gain full control of your indoor climate is follow the pre-programmed menu.

The simple and trendy three-button design gives easy access to an intelligent multifunctional menu, allowing you to control room and floor temperature while ensuring that the selected comfort temperature is continually maintained throughout your home. Even large rooms can be accurately controlled thanks to the possibility of utilizing master and power module.

- **Intuitive operation with quick set function**
- **Intelligent multifunctional menu**
- **Plug & play concept ensures easy installation**

Quality through and through

Design is about more than appearance. It also means reliability in every detail. With their high standard for safety and easy-to-use interface, the OJ Microline® series offers intuitive thermostats you can always rely on as they are designed from A to Z with a focus on quality. We provide an exceptional 3-year warranty whenever you purchase a thermostat from the intuitive OJ Microline® series.

- **Exceptional 3-year warranty**
- **High reliability standard**
- **Well-thought-out design and functionality**

When only the safest is safe enough

With built-in class A GFCI and double relays, the OJ Microline® intuitive thermostats are in a class of their own, meeting even the strictest safety requirements – no matter where in the home you wish to establish electric floor heating. You are thus protected against ground faults in the system, while the UL approval is your guarantee that you can enjoy the comfort of floor heating with complete peace of mind.

- **Built-in Class A approved GFCI**
- **2-pole relay**
- **Meets all statutory requirements**
- **Approved for installation in wet rooms - as well as in other rooms**

We have thought of both you and the environment

The OJ Microline® series of intuitive thermostats allows you to optimize energy saving. Thanks to their multifunctionality, the thermostats can be set to fulfill your individual needs, while saving energy with simple adjustment. The intuitive OJ Microline® series is equipped with built-in energy monitor, allowing readouts of heating use over the last 2, 30 and 365 days.

The intuitive OJ Microline® series allows you to control your floor heating system more efficiently and energy-consciously. It is therefore an investment in the future, both for you and for the environment.

- **Comfort and optimized energy saving**
- **Total control with energy monitor and standby function**
- **Future-oriented**
- **Environment friendly**

The intuitive OJ Microline® series contains 3 variants

Taking comfort further

OJ Electronics A/S is a European company which, thanks to more than 40 years' experience, has positioned itself as one of the world's leading manufacturers of thermostats for electric floor heating.

We design our controls with a continuous focus on quality, comfort, safety and energy consumption.
